This webinar will be about:

As credit card usage grows, B2B merchants continue to evaluate the fees associated with card acceptance. Some merchants have implemented surcharging (passing on the fees to the customer) and many more are considering it. This presentation will:

- 1) Review the credit card network surcharge rules and legal consideration
- 2) Discuss how to implement surcharging and the key considerations impacting B2B surcharging
- 3) Explain how merchants can reduce their card acceptance costs whether surcharging or not

We hope you can join us!

Thank you!
